

Bklyn: Best Science Books of 2020

Some of the year's most noteworthy science books of as selected by our librarian Brian Muldoon for WNYC Studio's Science Friday - Best Science Books of 2020 segment.

Created by BKLYNBrian

Entangled life : how fungi make our worlds, change our minds & shape our futures

Sheldrake, Merlin, author.

Merlin Sheldrake gets deep in the dirt with this wide ranging and ebullient exploration of the mycelial world. In rich poetic passages, he provides an eye opening glimpse into what life is like as a fungus, uncovering the ways their penchant for interconnectedness facilitates so much we rely on and...

The apocalypse factory : plutonium and the making of the atomic age

Olson, Steve, 1956- author.

While uranium gets much of the attention, it's plutonium that truly made the nuclear era. Weaving together heavy science with biographical narratives, this nuanced history illuminates the deep societal impact of the rush to mass manufacture this element at the core of the atomic bomb.

The Apocalypse Factory [electronic resource] : Plutonium and the making of the atomic age

Olson, Steve, 1956- author.

While uranium gets much of the attention, it's plutonium that truly made the nuclear era. Weaving together heavy science with biographical narratives, this nuanced history illuminates the deep societal impact of the rush to mass manufacture this element at the core of the atomic bomb.

Clean : the new science of skin

Hamblin, James, author.

Both a scientific exploration and social history of how we've come to care for our skin in the modern western world.

Consistently hilarious and informative, Hamblin makes a surprisingly strong case for never showering again, while not fully abandoning the undeniable benefits of certain hygienic prac...

Clean : the new science of skin and the beauty of doing less

Hamblin, James, author.

Both a scientific exploration and social history of how we've come to care for our skin in the modern western world. Consistently hilarious and informative, Hamblin makes a surprisingly strong case for never showering again, while not fully abandoning the undeniable benefits of certain hygienic prac...

Race after technology : abolitionist tools for the new Jim code

Benjamin, Ruha, author.

A blistering and necessary look at how emerging technologies reproduce and, in some cases, deepen social inequality. Pushing past claims of neutrality by its developers, Benjamin exhibits how everything from automatic soap

dispensers to predictive algorithms are built, whether intentionally or not,...

Black hole survival guide

Levin, Janna, author.

A delightfully engaging (and illustrated!) little book that uses deft analogies and warm prose to make the mind-bending complexity of black holes easy to comprehend. With contagious enthusiasm, Janna Levin walks through the various controversies and contradictions

surrounding this particularly stick...
