

Family Storytime @ TC May 4, 2013 - Bears & Dinosaurs

There are all kinds of bears and dinosaurs in this world. Bears like teddy bears, grizzly bears, polar bears, and panda bears are very common. Dinosaurs like tyrannosaurus, t-Rex, triceratops, and brontosaurus are some of the cool ones. It is interesting to know that most female children from this storytime session were interested in both topics and the male children were interested in mostly the dinosaur books. By asking questions, practicing pronunciations and spelling of vocabulary words, and also reviewing what happened in storybooks, can greatly help your children to improve on their reading comprehension and literacy skills.
